

Title: Analyst

Location: Dallas, TX

Qualifications

The preferred candidate will have 5 to 7 years of direct experience with business and/or financial analysis including market research, supply/demand, prices analyses, valuation or cash flow analyses. Candidates should hold an undergraduate degree – Economics, Finance and Marketing are ideal - and a graduate degree and/or MBA are beneficial. The successful candidate should be capable of taking written or verbal direction and executing assignments with little oversight, comfortable working in a deadline-driven environment, and equally proficient and experienced with the development and presentation of both oral and written analyses results, as well as proficient in Microsoft Word, Excel and PowerPoint. Candidates who apply should enjoy working in a collaborative atmosphere and have well-developed organizational skills. Successful analysts are self-directed and have strong entrepreneurial mind-sets and personalities that blend easily into diverse project teams. Candidates must currently be able to work in the United States without sponsorship.

Representative Assignments:

Analysts are expected to be proficient in a number of different areas; however specific assignments are typically staffed by a team of professionals drawing on specific individual expertise to complete analyses required by the client. Typical project assignments for Analysts include:

- Valuation
 - o Pricing Analyses – collaborate with Consultants to determine applicable pricing bases, locate appropriate source pricing, organize all pricing data in spreadsheet, adjust pricing bases to specific project characteristics and provide trend analyses or forecasting in collaboration with Consultants assigned to project
 - o Cash Flow Modelling – construct, populate and complete cash flow model representative of specific assets in the upstream, midstream and downstream oil, gas, refining, petrochemical and electrical generation sectors
- Market Studies
 - o Research and analyses to determine indigenous supply and demand for specific commodity products such as natural gas, motor gasoline, diesel fuel, heating oil, etc.
 - o Research and analyses of companies active in specific market segments
 - o Research and analyses of new market entrants
- Litigation Support
 - o Review of business books and records in preparation for detailed analyses
 - o Financial modeling of “what if” scenarios to establish potential damages
 - o Research and analyses of publicly available information to establish market conditions at specific points in time
